## DETAILED ACTION

### *Election/Restrictions*

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1- 27 and 36, 37 and 45 are, drawn to a method, process of making and one use.

Group II, claim(s) 36,37,45 are, drawn to a method of screening.

Group III, claim(s) 38- 40, 44, 53 and 60 are, drawn to a pharmaceutical.

Group IV, claim(s) 41, 46, 47, 51, 57 and 58 are, drawn to means to get structure.

The inventions listed as Groups I, II, III and IV do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the method of screening of Group II is a different inventive concept as it does not require the crystals of Group I and the material of Group III. It also does not require a computer or structural analysis of Group IV is screen. Group III is a different inventive concept as it is a drug with added materials that as not found in any of the other Groups. These addition materials are not required by the other Groups and are not [part of the inventive concept. Also, the inventive concept of Group IV is different from the other Groups as There is no need for a computer or structural analysis as part of the inventive concept.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
